PRELUDE

Praise be to Allah, exaltation and peace be upon the master of the messengers of Allah, Abi al-Qasim Mohammad and upon his kind and chaste progeny and those who fairly follow them till doomsday..

The Library and House of Manuscripts of Al-Abbas Holy Shrine determines to provide all what the researchers and readers need like books, English and Arabic sources, monographs and etc., in an endeavor to reach to the required scientific and cultural level to serve a large group of society. Therefore, we confidently find that it presents from time to time scientific and educational sources that focus on serving the knowledge seekers. Due to the rarity of some foreign sources, high cost and difficulty of getting them in print form, all that factors burden the researcher and abstract the completion of his or her own research. So it is decided to work on providing them in a digital form. After trusting in Allah and getting the assistance of some university professors (as an advisory side) to select the required books for the post graduate students and the college students which are essential to prepare their researches in various fields of specialties. Tables have been arranged to those books. They are provided through downloading them from the internet or contacting with knowledge sources represented by the Iraqi central university libraries and the other sources. The books are arranged, classified and cataloged according to the international standards by depending on the library of congress classification. Subjects have been extracted that every book dealt with and its details then affixing minimized pictures to them and every specialty marked with a specific colour to get it easily. The reverend researcher can obtain these books and others which are not listed in this guide when he or she visits the Electronic Library Unit in the library and house of manuscripts of Al-Abbas Holy Shrine.

Finally, we invoke Almighty Allah for successfulness and praise be to Lord of the worlds.
